

Current status and methods

- ★ Muon neutrino helicity

- from measurement of $^{12}\text{B}_{\text{g.s.}}$ polarization:

$$^{12}\text{C}(\mu^-, \nu_\mu)^{12}\text{B}_{\text{g.s.}}, \quad h_{\nu_\mu} \approx -1.06 \pm 0.11.$$

$^{12}\text{B}_{\text{g.s.}}$ polarization from β –asymmetry

- from polarization observables in π/μ decay

Current status and methods

$$h_{\nu_\tau} = -0.995 \pm 0.010 \pm 0.003.$$
